Shower Door Systems

What we offer

The Highest Quality Shower Door Enclosures

Glassfab Tempering Services, Inc.

At Glassfab Tempering Services, Inc., we offer a wide range of shower door products to suit every style and budget. Our tempered glass shower doors are available in a variety of thicknesses and finishes, including clear, frosted, and patterned glass. We also offer customizable options, such as glass thickness, hardware finishes, and designs, allowing you to create a unique and personalized shower enclosure. Our products are not only visually appealing but also highly functional, offering easy access, water containment, and durability. Whether you're looking for a frameless, semi-frameless, or framed shower door, we have the perfect product for your needs. Let us help you transform your bathroom into a luxurious and inviting oasis with our high-quality shower door products.

- Fabrication and hole locations must adhere to our GTS tempering process as well as the guidelines specified in ASTM C1048.
- All heat-treated products are subject to a minimum seamed edge, unless otherwise specified by the purchaser for Flat Polish.
- Holes must be within Tempering Guidelines, or relief cuts may be necessary.
- Any GTS Inc. heat-treated glass may not be modified, drilled, sandblasted, ground, polished, or fabricated, and doing so voids any warranty.
- Purchasers must specify and assume responsibility for passing building compliance inspections for NO LOGO orders.
- All GTS Inc. heat-treated glass will have a logo per code.

Frameless Reverse Shower Door

Shower Door Components

TEMPERED GLASS CAPABILITIES: UP TO 130" WIDE X UP TO 315" TALL

Edge Profile

Heat-treated glass products require an edge profile:

Seamed Edge
Flat Polish
Flat Ground

Pencil Polish
Single & Double Chip
Radical Wave Chip

Custom Fabrication

Glassfab's precise drilling, notching, cutting, and CNC shaping includes:

Hole Drilling
Corner Notch
Hinges

U-Clamps
Radius Corners
Custom Cutouts

Diamon Fusion

Diamon-Fusion® is a patented coating that chemically bonds to the glass, creating a permanent seal that transforms ordinary glass into a high-performance, water-repellent surface. Surfaces treated with Diamon-Fusion® become easier to clean and require less maintenance.

ShowerGuard & Clarvista Products

Shower glass that has advanced coatings fused to the surface. This covers the microscopic peaks and valleys that occur naturally in float glass, creating a smoother surface. This permanently protects the glass from the damaging effects of hard water, heat, humidity, soap residue and cleaning agents.

Glassfab Is Excited to Announce its new FuseCube Flex 125!

At a microscopic level, glass is quite rough. Inevitably, this allows hard water and environmental pollutants to easily penetrate the surface causing unwanted stains. Diamon-Fusion® is a patented two-step process that chemically bonds to the glass filling in the microscopic peaks and valleys of the surface.

Thin and invisible, Diamon-Fusion chemically bonds to the glass, transforming it into a water-repellent surface, protecting it from stains and corrosion.

The coating is also UV-resistant and eco-friendly, offering long-term performance and stability. The coating can be applied to a wide range of surfaces, including shower doors and glass railings, and is backed up by a lifetime/15-year warranty on residential and commercial surfaces, respectively.

With enough space to fit 125 lites, the FuseCube Flex 125 will allow Glassfab Tempering Services to treat a wide range of glass products, including glass railings, IGUs, shower doors, and much more.

With Glassfab Tempering Services adding the new FuseCube to its production facility, it is now the largest FuseCube installed in North America.
